

Adding Color to Your Life

DROUGHT SURVIVAL TIPS

1. Plant your plants where they belong. Know the light/sun requirements of the plants. Know your site. Read Greenhouse signs and tags.
2. Amend your soil.
3. Weed!
4. MULCH, MULCH, MULCH! Mulches include shredded cedar, bark chips, composted bark known as Soil Prep(also available in bulk at Kubota), rock, dense planting, leaves, weed barrier.
5. Always water the first year to get plants established.
6. Plant drought tolerant plants. Our lists will get you started!
7. Replace grass with garden; gardens use less water than lawns.
