Adding Color to Your Life

Garlic Planting Directions.

In mild winter areas, plant October-December for early summer harvest. Where winters are cold, plant early in spring. Break bulbs up into cloves and plant base downward, 1-2 inches deep, 2-3 inches apart, in rows 1 foot apart. Harvest when leafy tops fall over. Air-dry bulbs, remove tops and roots, and store in cool place. Giant or elephant garlic has unusually large (fist-sized) bulbs and mild garlic flavor.
